

POWERING YOUR CAREER

**Commercial Engineer
Role Profile**

Do you have what it takes to play a key role in shaping the electricity distribution network of the future and be at the heart of achieving net zero?

We are Northern Powergrid, and we are responsible for powering everyday life for 8 million people across the Northeast, Yorkshire and northern Lincolnshire. We are a diverse team, creating a smarter, more flexible electricity distribution network that will enable our region to decarbonise and meet the needs of our customers now, and in the future.

The Commercial team are responsible for managing commercial relationships with key stakeholders to ensure the network develops to a smarter, more flexible network that is central to the region's journey to net zero.

This is an exciting opportunity at a time of significant and fascinating change within the energy sector, and distribution networks will be at the heart of achieving net zero. As a Commercial Engineer, you will be an integral part of achieving this.

What will you do?

- Manage direct relationships with our stakeholders; providing support and guidance
- Prepare and issue quotation offers to our stakeholders and customers
- Managing accepted connections schemes
- Plan, develop and implement new policies and codes of practice in commercial areas
- Attend meetings with our stakeholders

What's the package?

Along with a competitive salary of £45,943 - £62,828 we also offer great benefits such as:

- Enrolment into our double-matched pension scheme
- 25 days holiday (rising with service)
- Car allowance / company car scheme
- Payment of professional fees
- Excellent opportunities for career growth

We're excited to hear from candidates with a passion for our company and the industry and a desire to succeed. [**Apply now**](#) and we'll be in touch.

Commercial Engineer

Location: Northeast and Yorkshire

Does this sound like you?

- **Team working** is essential in this role to develop and implement new solutions. You will be part of a high-performing team, delivering for our customers
- Confident **decision-making skills**
- Great aptitude and **motivation** to work in a fast-paced environment
- **Problem solving** is a must when faced with the scale and pace of change facing us, not to mention the number of exciting challenges and level of innovation required
- **Deliver quality outputs to required deadlines**
- **Excellent verbal and written skills**, with the ability to effectively communicate with stakeholders from across the business and wider industry

What qualifications and experience should you have?

- Level 5 or 6 (HND, degree, or equivalent) in STEM subject, or a level 4 qualification (e.g., HNC) with at least three years of relevant experience
- Experience of operating within the industry commercial arrangements, including connections agreement and licence condition requirements
- Full driving licence
- Knowledge of the distribution network operating arrangements
