

POWERING YOUR CAREER

Telecoms Engineer

Role Profile

Do you have what it takes to play a key role in shaping the electricity distribution network of the future and be at the heart of achieving net zero?

We are Northern Powergrid, and we are responsible for powering everyday life for 8 million people across the Northeast, Yorkshire and northern Lincolnshire. We are a diverse team, creating a smarter, more flexible electricity distribution network that will enable our region to decarbonise and meet the needs of our customers now, and in the future.

The Telecoms team are responsible for the development and operation of the communications systems to ensure the network develops to a smarter, more flexible network that is central to the region's journey to net zero.

This is an exciting opportunity at a time of significant and fascinating change within the energy sector, and distribution networks will be at the heart of achieving net zero. As a Telecoms Engineer, you will be an integral part of achieving this.

What will you do?

- Provide technical support with the design, development, business analysis and use of Telecoms and IP Data Networks technology including architecture integration capabilities
- Provide overall project management and direction to team members
- Understand and capture technical requirements when providing network impact analysis for new projects
- Articulate the IP Data Network solutions to internal teams, ensuring the solution provides straight forward deployment to be managed on a continual basis
- Support any internal and external auditing of the IP Data Networks area

What's the package?

Along with a competitive salary of £45,943 - £62,828 we also offer great benefits such as:

- Enrolment into our double-matched pension scheme
- 25 days holiday (rising with service)
- Car allowance / company car scheme
- Payment of professional fees
- Excellent opportunities for career growth.

We're excited to hear from candidates with a passion for our company and the industry and a desire to succeed. [Apply now](#) and we'll be in touch.

Telecoms Engineer

Location: Northeast, Yorkshire and north
Lincolnshire

Does this sound like you?

- **Team working** is essential in this role to develop and implement new solutions. You will be part of a high-performing team, delivering for our customers
- Confident **decision-making skills** and ownership of issues for continuous improvement
- Excellent **technical knowledge**, including an understanding of IP Data Network Systems and support and integration of data systems to other systems and networks
- **Problem solving** is a must when faced with the scale and pace of change facing us, not to mention the number of exciting challenges and level of innovation required
- **Deliver quality outputs to required deadlines**
- **Excellent verbal and written skills**, with the ability to effectively communicate with stakeholders from across the business and wider industry

What qualifications and experience should you have?

- Level 5 or 6 (HND, degree, or equivalent) in a Telecoms related subject, or a level 4 qualification (e.g., HNC) in a relevant subject with at least three years of relevant experience
- Full driving licence
- Knowledge of telecoms data network systems and infrastructure
- A proven background in delivery of Telecoms projects
- Detailed understanding of TCP/IP Protocols
- Can design and deliver basic LAN / WAN re-configurations
